AFFAIRS OF THE DISTRICT.

A Sewage Disposal Field for the New Ruppert Home.

Views of the Plumbing Inspector and Bealth Officer on the Subject-Standpipes on Business Houses-Regarding Street Name Changes.

J. J. Appich and others, of the Building Committee of the proposed Ruppert Home, have submitted to the Commissioners for a proval the plans and specifications for a sewage disposal field for the home on the Good Hope Road. They request that after the plans are fully examined that permit be issued for the same. The matter was referred to Charles B. Ball, the Inspector of Plumbing, who has reported that this project for a field is similar to two which have received the

approval of the Commissioners, the latest of which was for the butterine factory. "I have examined the location," says the inspector, "in which it is proposed to construct the field, and find it suitable for the purpose, and a number of hundred feet distant from the nearest building.

"I respectfully call attention to the fact that the effluent from this sewage disposal field is to be discharged on property not belonging to the establishment owning and operating the field itself. It seems to me desirable, therefore, that before issuing a permit for the construction of this sewage disposal field, the consent of the owners of the land which is to receive the effluent be obtained and made a matter of record along with the within application.

"I recommend that when the within plan shall have been modified by the addition of a receiving pit, with automatic siphon as suggested, and after the filing of the consent of the owner of the land which is to receive the effluent for the discharge of such effluent thereon, permission be granted for the construction and maintenance of the system of sewage disposal then covered by this application.

It is understood that the action of the

The Commissioners yesterday had under onsideration and passed upon an incresting question relative to the levyteresting question relative to the levy-ing of water main assessments on corner lots in Eckington. It appears that a water main was laid in 1884 to supply let 14, block 15, centre of Eckto supply lot it, block is, centre of near ington subdivision, and that the property was assessed for the same. This assess-ment was canceled the following year un-der the decision in the Burgdorff case, Re-cently another main was laid beside this lot in V Street and the property has now been assessed for the payment for the latter named main. The owner objects to paying for a main which does not supply his premises with water and the Commisers are of the opinion that he should pay the latter assessment on the ground that the lot has been supplied with Poto-mac water since 1884, and that no assess

The Commissioners again yesterday re

several communications relative to the proposed changing of the streets in the suburban portions of the city. E. C. Andrus, of 40 Q Street northeast,

plication of names can simplify the pres-ent system. What purpose, for instance,

can be served in changing Q. R. S. and other streets because they extend beyond Florida Avenue, or what claim is advanc-

ed that Bloomingdale and West Ecking-ton are not essential parts of the city

August Peterson, who resides on Chapin

Street, protests against the proposition

Street, protests against the proposition to change Chapin Street to Zane Street. "Who is Zane?" he asks. "Encyclopedias do not give it, and the only place where it has been accidentally found is in the Washington directory. The possessor of the name resides in Anacostia, and is a clerk in the Treasury Department. If, by adopting the name Zane, you contemplate doing honor to this estimable lady, you should not forget that there are others in the Government service to whom a like honor is due.

the suburban portions of the city.

eived several communications relative to

the purpose, and a number of hundred.

The would be my own preference in such been or shall hereafter be introduced; by the constructions to provide a receiving chamber in which the sewage should be restored for at least thirty-six hours, and then by automatic siphon discharged upon the field. However, as it has not been deemed necessary heretefore to in set upon such an arrangement, I see no reason why this project should not receive approval.

"The case hould be referred to the Health Officer, as have been previous cases of the kind."

The papers in the case, were then referred to the Health Officer, as have been previous. The papers in the case, were then referred to the Health Department, and Dr. William C. Woodward, the Health Officer, as have been previous as field can, in my judgment, be constructed and maintained without nuisance or danger to public health if it be modified by constructing a receiving chamber provided with an automatic siphon, as suggested by him would apparently does not appear to me that the Commissioners after having waived the exercise of their remedy until the period of statutory limitation had expired, having the construction of a receiving paper in the construction of a receiving paper in the construction of a receiving chamber provided with an automatic siphon, as suggested by him would apparently be in no way commensaries to the containing the sewage of from four to eight hours being ample for precent purposes.

"It does not appear to me that the Commissioners and the officers and this expired to the containing the sewage of from four to eight hours being ample for precent purposes.

"It respectfully call atticution to the fact that the effluent from this sewage disposes, as the containing the sewage of from four to eight hours being ample for precent purposes.

"It respectfully call atticution to the fact that the effluent from the same replaced to the containing the sewage of from four to eight hours being ample for precent purposes.
